PROFESSIONAL SUMMARY

System Administrator & Cloud Architect with 2.5+ years of experience in AWS cloud infrastructure, Linux server administration, networking, and website hosting. Skilled in server setup, cloud deployment, DNS configuration, SSL installation, and automated backups. Experienced in managing secure and scalable environments with minimal downtime. Dedicated to delivering reliable IT support and efficient technical solutions.

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, S3, VPC, Route 53, Auto Scaling), GoDaddy, SiteGround
- Operating Systems: Linux (Ubuntu, RHEL)
- Networking: LAN/WAN, Routers, Switches, Port Forwarding
- Server Admin: Apache, MySQL, FTP/SSH, cPanel/WHM, CyberPanel
- Automation: Bash Scripting, Crontab Scheduling, rsync automation

PROFESSIONAL EXPERIENCE

System Administrator & Cloud Architect

Indev Consultancy Pvt. Ltd., Noida, UP, India.
Sep 2023 – Present.

- Managed and maintained IT infrastructure to ensure 24/7 uptime and scalability.
- Handled Linux servers, Apache, MySQL, FTP, and SSH.
- Migrated websites and applications between GoDaddy, SiteGround, Hostinger, and AWS.
- Configured DNS records (A, AAAA, CNAME, MX, TXT - SPF, DKIM, DMARC) for domain and email services.
- Implemented SSL certificates in Linux environments using Certbot with Apache.
- Managed 70+ desktops/laptops, printer setups, and hardware inventories.

AWS CLOUD PROJECTS

Scalable AWS Infrastructure Deployment

- Designed and deployed scalable cloud infrastructure on AWS using EC2, Elastic Load Balancer (ELB), and Auto Scaling to ensure high availability and performance optimization.

Secure VPC & Network Architecture Implementation

- Configured secure AWS networking environments, including VPC, VPC Peering, Route Tables, Elastic IPs, and Route 53. Implemented firewall-level security controls to protect production environments.

Cloudflare & Domain-Level Security Integration

- Integrated Cloudflare for DNS management, IP masking, SSL security, and DDoS protection. Improved website performance and ensured secure global traffic routing through load balancers and DNS optimization.

SERVER & HOSTING PROJECTS

Multi-Server Reverse Proxy Architecture

- Connected 8 in-house servers using a single static IP through a reverse proxy configuration. Ensured secure routing, centralized access management, and optimized internal traffic flow.

Large-Scale Website Migration & Hosting Management

- Migrated websites and applications (WordPress, CodeIgniter 4, CMS platforms) between GoDaddy, SiteGround, Hostinger, AWS, and local servers, ensuring data integrity and near-zero downtime.

Automated Backup System for 50+ Websites

- Developed automated backup solutions using rsync and crontab scheduling for over 50 websites. Implemented incremental backup strategies and disaster recovery planning.

SSL Deployment & Web Server Hardening

- Generated and deployed SSL certificates using Certbot with Apache in Linux environments. Configured secure HTTPS environments and optimized server configuration.

EDUCATION

- B.A. from Delhi University, 2021
- Certification Courses: AWS, Linux, and CCNA – Ducat
- 1-Year Computer Diploma
